

“Demonstrating resource efficient through innovative, integrated waste recycling schemes for remote areas”

Current actions for the Municipality of Ancient Olympia:
Local Communities of Ancient Olympia, Pelopio and Platanos

- Completion of the installation of the prototype Green Kiosks
- Information and training events for the operators of the system and the local community
- Didactic events in Primary and Secondary Schools

Completion of the installation of the prototype Green kiosks at the Municipality of Ancient Olympia

The construction and installation of the prototype recycling systems has been completed and their installation sites were selected after public consultation with the local residents and authorities. The final sites and systems at the three local communities of Ancient Olympia Municipality, are situated in central areas of the towns, in order for them to be easily accessible and noticeable. Their operation is expected to start soon.

Training sessions and start-up events for the residents at the Local Communities of Ancient Olympia Municipality

Within the framework of implementing information and public awareness actions, the NTUA working group in collaboration with the local authorities of the three local communities of the municipality of Ancient Olympia, organized the **1st information campaign** for the start-up of the Green Kiosks and the **2nd training seminar** for the residents at the local communities implementing the project.

The **purpose** of the events was:

- to inform the residents about the launching of the Green Kiosks and the procedure that needs to be followed in order to actively participate in the project.

During these events, which took place in December 2019, leaflets were distributed which provided guidance on the proper separation of the recyclable waste at source and the overall operation of the recycling system, as well as bags of different colours to help residents separate the materials according to the four main recycling streams (paper/cardboard, plastic, metal and glass).

Municipal representatives informed and distributed equipment to a total of **495** households at the three local communities.

Educational events for Primary and Secondary Schools

The students were informed about the operation of the prototype Green Kiosks in their community and the importance of recycling for protecting the environment.

In February 2018, educational events took place at primary and secondary school units at the local communities of Ancient Olympia, Pelopio and Platanos. A total of 496 pupils from kindergartens, primary schools and high schools attended the event. The students were informed about the importance of recycling and how they can contribute to protecting the environment through participating in the project.
