Conducting an International Conference on Sustainable Solid Waste Management

The National Technical University of Athens, in collaboration with the Municipality of Naxos & Small Cyclades, the Municipality of Ancient Olympia and the Cartif Technological Center in Spain, organized the 6th International Conference on the Sustainable Management of Solid Waste 6th International Conference on Sustainable Solid Waste Management, which took place on the island of Naxos, June 13-16, 2018.

The main objective of the conference was to address the issues of environmental management and in particular the sustainable management of solid waste through the promotion of efficient and innovative technologies. At the same time, it aimed at informing both the local community and the scientific community about the latest developments in the field of best environmental management practices. The conference attended over 550 participants from 80 different countries on the planet.

Training sessions and start-up events of Green Kiosks of the residents at Local Communities of Small Cyclades Islands

In the framework of the implementation of the actions of information and public awareness, in particular of Action D5 Training Activities and Action D4 Information Campaigns, the NTUA working group organized the 1st information campaign for the start-up the Green Pavilion and the 2nd training seminar for residents in each of the local communities implementing the project. The purpose of the events was to inform residents about the launching of the Green Recycling Materials Management Pavilions, their training for their proper use and the procedure to be followed in order to participate actively in the project. The event was attended by residents and visitors to the Small Cyclades of the Municipality of Naxos & Small Cyclades, where the project is being implemented. At the same time, the NTUA working group in order to increase the participation of residents in the project has been given door-to-door personalized cards for collecting and redeeming points and brochures with instructions on separating recyclable waste at source and the overall operation of the recycling system. The NTUA Working Group distributed equipment to a total of 202 households and businesses in the local communities of Koufonisi, Donousa, Schinoussa and Iraklia
