

“Demonstrating resource efficient through innovative, integrated waste recycling schemes for remote areas”

Current actions for the Municipality of Naxos & Small Cyclades:
Local Communities of Koufonisi, Iraklia, Donousa and Schinoussa

Progress made by the operation of the prototype recycling systems in the Small Cyclades, for each island, during the 1st quarter of 2021

Results of the project for each Local Community, regarding the 1st quarter of 2021

The prototype recycling systems began to operate during the summer of 2018. Since then, they have made a significant contribution to the management of the Small Cyclades' waste, as they constitute the only recycling infrastructure found upon the islands that comprise the target areas.

Iraklia

Donoussa

Schinoussa

Koufonissia

In the 1st quarter of 2021 up to **6,7 tons** were collected. Since 2018, more than 74 tons of recyclable materials have been collected.

Results of the project for each Local Community, regarding the 1st quarter of 2021

Donoussa

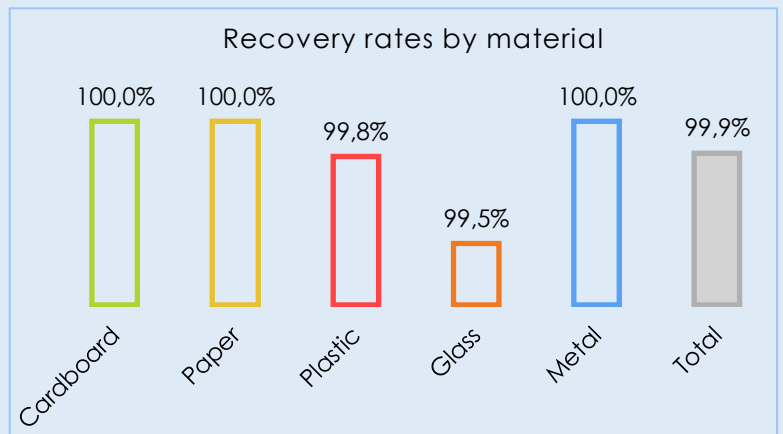

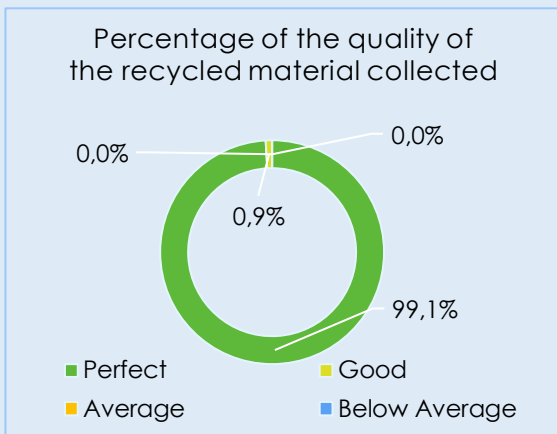

More than **1.4 tons** of high-quality recyclable materials have been collected, most of which constitute **plastic** and **cardboard**. The recyclable materials entering the system are recoverable by **93.1%**, with two significant streams such as **glass** and **metal** surpassing the average percentage.

Results of the project for each Local Community, regarding the 1st quarter of 2021

Schinoussa

More than **1.8 tons** of high-quality recyclable materials have been collected, most of which constitute **cardboard** and **plastic**. The recyclable materials entering the system are recoverable by **99.9%**, with all recyclable streams containing almost zero impurities.
